We looked briefly through my code structure, you gave me some suggestion to structure my folders in a more access able way.
I asked you to take a look on some code I wasn't sure is good but you assured me its fine.
The last thing we talked about was flow of verifying an email address with verification code or link.

I showed you my new features, getting the cheapest flights from the user location, notifying a user if the flight price changes, deleting a user and editing the user info.
I also asked if you can find a solution to bypass the spring security login form

I showed my web sockets implementation, both for a global channel and a
private channel.
A user gets a private notification when his flight price changes.
Admin can send a global notification to all users.
Logic layer has more then 80% covrage as you told me to do last sprint.
Next Ill implement extra functionality: admin can delete users, user can
update his info, ux report.
After thats done I want to make my own chat bot that will help users to find
a flight.

We went over my sprint 3 submission. I asked about my grading and after
going over it again you changed my grades. We also discussed the way
going forwards and what I should focus on.

I asked for help planning the flow of my next user story, we agreed that Ill
divide it to 3 stages, at first Ill find a way to implement an interval in the
backend that will check if the flight prices changed.
I also asked what is a better way to store the access token, in the
authorization header or in httpOnly cookie, Im waiting for you answer :)

Checkpoint 8   Maja   04-11-2022   ☺

Nechushtan Stamper, Nur N.   2 months ago
I showed you my implementation of my authentication and authorization
using access and refresh tokens. You gave me feedback on my research
document.

You gave me feed back on my C4 diagram. I also showed you my problem
with the google places api and we agreed together that I should leave it for
now and I could come back to it if Ill have time later on.

Checkpoint 6 Jacco 04-10-2022 ☺ ☺

I showed you my progress, you told me you are happy with my work and Im
in a good pace.

Checkpoint 5 Maja 04-10-2022 ☺ ☺

Nechushtan Stamper, Nur N. 3 months ago
I Showed you my progress so far in the project, I implemented the google
places api in my frontend for airports autocompletions, and the an external
api in my backend to fetch real flight data.
We discussed how I can notify a user if the flight price changes and you
suggested me to wait until we learn web sockets for that.

Yesterday we had our first meeting.
Your feedback was:
you said Im engaged in classes, and after our meeting you understand that
Im more eagered to learn then what you thought.

Checkpoint 3 Jacco 09-09-2022 ☺

Nechushtan Stamper, Nur N. 4 months ago
We went over my project plan and the user stories, you recommended to
keep it at the user level and not to go into technical details.
We also talked about the backend application and way my data process will
go from end to end.

Checkpoint 2 Maja 09-09-2022 ☺

Nechushtan Stamper, Nur N. 4 months ago
I came to you to ask if it will be ok to use an external api in my project. You
said its not a problem but that I need to see where I use it the project and to
make sure Im not breaking one of the SOLID principles.
